

MOEZ AOUADHI

INDUSTRIAL AUTOMATION & APPLICATION ENGINEER

Ben Arous, Tunisia | +216 20 027 687

Moezaouadhi19@gmail.com | [linkedin.com/in/moez-aouadhi19](https://www.linkedin.com/in/moez-aouadhi19)

PROFESSIONAL SUMMARY

Industrial Computer Engineer specializing in industrial automation, PLC programming, robotics, embedded systems, and industrial software development. Hands-on professional experience with Siemens S7-1200/S7-1500, TIA Portal, and Profinet, complemented by academic and training experience with ET200 and HMI configuration. Experienced in commissioning, troubleshooting, process optimization, and developing practical automation solutions for industrial environments. Skilled in Python scripting for automation, data processing, and system integration tasks.

CORE COMPETENCIES

PLC & Automation: Siemens S7-1200/S7-1500, TIA Portal, Profinet, Ethernet, Profibus, PLC programming, commissioning, troubleshooting, HMI and ET200 (academic/training).

Robotics & Software: RoboDK, Mastercam, six-axis robotics, Python, C/C++, Java, SQL/MySQL, web development, ESP32, Raspberry Pi, computer vision and deep learning.

PROFESSIONAL EXPERIENCE

PLC & Automation Engineer, Gemin Installation

Tunisia / Algeria project assignment | Apr 2026 – Present

- Support automation engineering, commissioning, and production start-up activities for SIDEL industrial systems.
- Configure, test, and commission Siemens S7-1200/S7-1500 PLCs and Profinet industrial communication networks.
- Resolve technical issues during installation and production start-up to support stable system operation.
- Completed advanced training in Siemens PLC programming with TIA Portal, strengthening practical commissioning capability.

Software Developer, Best Info

Megrine, Tunisia | Aug 2025 – Mar 2026

- Designed and developed web, mobile, and desktop applications using WinDev, WinDev Mobile, and WebDev.
- Translated requirements into software solutions and integrated database systems.
- Improved usability and application performance through structured testing and optimization.

SELECTED PROJECTS & INTERNSHIPS

Final-Year Engineering Project, SIAF

Sfax, Tunisia | Feb 2025 – Jun 2025

- Developed an offline robot-programming workflow in RoboDK for a six-axis CRP RH industrial robot.
- Generated and optimized machining toolpaths in Mastercam and integrated G-code into RoboDK.
- Implemented automatic collision detection and correction for safer trajectory validation.

ESP32 Conveyor Monitoring System, IRD SOLUTION

Korba, Tunisia | Jul 2024 – Aug 2024

- Programmed an ESP32 using C/Python to detect and record conveyor items and built a live monitoring dashboard.
- Developed the web solution using HTML, CSS, JavaScript, PHP, and MySQL.

ADDITIONAL PROJECTS

AI-Based Access Control System, Center Delice

Bousalem, Tunisia | Jul 2023 – Aug 2023

- Created a facial-recognition access-control system on Raspberry Pi using Python and a CNN-based deep-learning model.
- Implemented real-time identification, streaming, alerts, and Firebase data storage.

Automated Production Process, CSM_Gias

Bouargoub, Nabeul, Tunisia | Feb 2022 – Jun 2022

- Automated a spreadable-paste manufacturing process by replacing manual operations with automatic valves.
- Developed order-management logic in TIA Portal and created an HMI for process visualization and control.

Industrial Inventory Management Application, Electronics Company

Sidi Rezig, Tunisia | Aug 2021 – Sep 2021

- Developed an application to track raw-material stock and improve inventory-flow visibility using web technologies, SQL, and Firebase.

EDUCATION

National Diploma of Engineer in Industrial Computer Engineering

National School of Electronics and Telecommunications of Sfax | 2023–2025

Professional Master's in Development Engineering, Computer Robotics & Artificial Intelligence

Higher Institute of Technological Studies of Rades, Tunisia | 2022–2023

National Degree in Electrical Engineering — Automation & Industrial Computing

Higher Institute of Technological Studies of Rades, Tunisia | 2019–2022

Bachelor's Degree in Technical Sciences

Secondary School Bousalem, Tunisia | 2018–2019

TECHNICAL SKILLS

- Automation: Siemens S7-1200/S7-1500, TIA Portal, Profinet, PLC programming, commissioning, troubleshooting, HMI and ET200 configuration (academic/training experience).
- Robotics & AI: RoboDK, Mastercam, six-axis robotics, computer vision, deep learning, CNN.
- Software & Embedded: Python, C, C++, Java, SQL/MySQL, HTML, CSS, JavaScript, PHP, ESP32, Raspberry Pi, Arduino.
